## IMPORTANT NOTICES

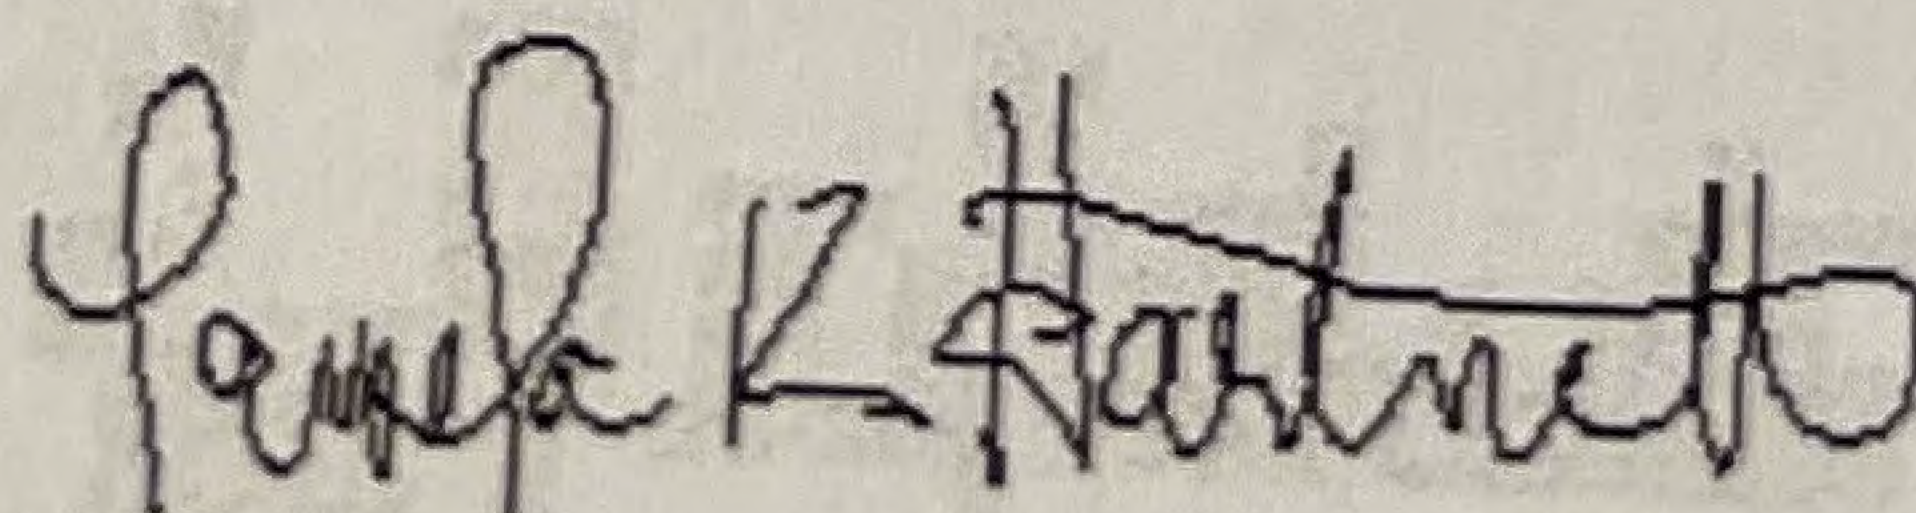

Welcome to membership in Halifax Electric Membership Corporation. We are happy to have the opportunity of providing your electric service needs. You should be aware that electric energy can, on occasions, be dangerous when supplied to premises which have not been properly wired to receive electric service. In addition, if electric appliances (such as heating units, stoves, fans, ovens, television sets, toasters, microwaves and the like) have been inadvertently left in an "On" position, a hazardous condition may result when your electric service is energized. It is possible that the Halifax representative will come to install or energize your electric service at a time when no one from your household or business is present. Therefore it is your responsibility, as a portion of your membership obligations, to be sure that your premises are safe and that all electric appliances have been turned off prior to the installation of energizing of your electric service. Section 1.08 of your Cooperative's bylaws requires that you keep and maintain your premises, and all appliances attached therein, in a safe condition, ready to receive electric energy. By receipt of this notice, you specially authorize and instruct the Cooperative to proceed with the installation and/or energizing of electric service to your premises. Thank you for your cooperation!

Halifax Electric Membership Corporation is not responsible for any damage to underground lines, septic tanks, drainage fields, etc. whose location has not been specifically pointed out to Halifax employees or agents. Location of such underground facilities is the responsibility of the member or his family, employees or agents. Further, Halifax is not responsible for any damage to grass, flowers, shrubs, or other landscaping located near or on the path or construction contemplated herein.
